

## **Developing Human Capital**

38:533:634

Spring 2021

This is a full online course developed within the Canvas learning platform. This Canvas course site has all the information for you to access the pre-recorded lectures, presentations, weekly assignments and discussion questions. I will have weekly virtual office hours Wednesdays noon to 1 pm EST to recap our learning and connect with you as needed. The principal exercises will be project based team cases and corresponding presentations. Please take time to review this syllabus to understand the entire course requirements and structure. The Canvas site for this course also has this syllabus as a framework for this fully online course.

This interactive, theoretically anchored, and applied course is aimed at understanding the process and practice of developing human capital. It focuses on the strategic development of talent framed within the context of talent leadership. It is anchored in business strategy and views the arena of talent management as a critical means to achieve competitive advantage.

As human resource competencies have become a significant competitive advantage both in North America and globally, the pace and intensity of organizational training has increased dramatically. Organization Development/Effectiveness groups must demonstrate not only that their programs provide enhanced employee competencies, but that those competencies are of strategic value to the organization. Some organizations now include continuous learning, often called the "learning organization", as part of their strategy. As a company's strategies change, and the types of management competencies and profiles need to change as well, Human Resource Development is responsible for this alignment. We will address these and related issues based on the belief that effective development practices are determined by the organizational context in which they occur.

The first half of the course will focus on development and learning. The second half will focus on performance appraisal. However, both areas will be integrated to reinforce a complete human capital development framework. Lectures, a team project and learning principles will propel course learning as we explore global best practice models of development and appraisal.

Grades will be based on a mid term and final exam and a team case project. Class virtual discussion participation can have a positive impact on your grade. In the spirit of a real world best-in-class application and to reinforce learning, class project teams will examine an appraisal program and supporting development practices in the context of

an organizational/company setting.

A course outline and assigned readings will be available the first day of class. Texts include: Employee Training and Development by Raymond Noe. Participants will be provided with useful tools for applying concepts discussed and debated in virtual class sessions with the view of gaining competency in human resource development.

### *Attendance*

Class participation will have an impact on what you learn. Discussion in virtual class permits you to listen to and engage in discussions about the topics covered. Questions are expected and will reinforce learning.

### *Examinations*

There will be a midterm and a final examination. The examinations will be either exclusively or primarily objective in nature

### *Team Project and Presentation*

Critical thinking, teamwork, communication, and execution skills are four abilities that are valued by business today. Presentations to be made in class are required and will aid you in the development of most of these abilities. You will organize into teams (4 and 3 member groups) to address the projects. Each presentation will be a maximum of 45 minutes to include questions.

The grade your team receives will be based upon the clarity of the presentation, creativity in orientation, the transitions between team members, presentation style, opening, development, and closure of the topic. Of major importance is making a complete presentation in the time allotted. This will require that your presentations be concise and well organized.

### *The Project*

The first project will address developing a training and development program supporting a specific firm. Ideally, this program is linked or supports the firm's performance appraisal system. The organization must be approved by the instructor prior to starting the project. A 10-12 page paper is required in addition to the supporting PowerPoint presentation.

More details will be provided in the course of the program. *The instructor will be available to guide and oversee your team's project work!*

### **Computation of Final Grades**

- **30% Mid-term**
- **30% Final**
- **40% Team Presentation**

### *Academic Honesty*

It is expected that each student's or team's work will be the exclusive result of his/her own efforts

### *The Learning Environment*

In order to maintain the proper learning atmosphere, there shall be no biased statements or related behaviors which are associated with race, gender, national origin, or sexual orientation.

If you have a condition that requires special attention, contact me as soon as possible so special arrangements can be made. Retroactive changes such as re-administration of an examination or change of grade based upon previously unknown conditions will not be made.

## Spring 2021
